

1      **In the specification:**

2      Please add after page 4, line 14 the following:

3      - - Runge, et al, in U.S. Patent 6,164,018 discloses a  
4      theater structure with several theaters in the building having a  
5      common concession area and a hallway connecting the theaters and  
6      a mezzanine level above the viewing level for use as a projection  
7      booth. However, the Runge invention does not provide for two  
8      segregated viewing levels nor does the invention provide for the  
9      showing of different format motion pictures in different  
10     theaters.

11     - - Graves, et al, in U.S. Patent 6,047,798 discloses a  
12     theater with a movable first screen for showing regular format  
13     motion pictures and a movable second screen for showing different  
14     formatted motion pictures. A sound system mounted on a frame for  
15     one screen is disclosed. This invention does not provide for  
16     several individual theaters in one structure nor does the  
17     invention provide for segregated viewing levels with a mezzanine  
18     on each segregated viewing level. - -
